Projects

- Twitter Clone**, <https://github.com/Bhavishm009/twitter-clone> 02-2023 – 02-2023
I utilized React JS and the Material UI library to design the frontend of a Twitter website.
Additionally,The functionality of posting tweets, liking them, and leaving comments using React Recoil.
- Beauty Saloon**, <https://github.com/Bhavishm009/Beauty-saloon> 03-2023 – 03-2023
A beauty salon app using React is a web-based application that allows users to book appointments for beauty treatments such as haircuts, manicures, pedicures, facials, massages,.user also make payment for services The app is built using the React framework, which is a popular JavaScript library used for building user interfaces.
- HomePageMFE**, <https://github.com/Bhavishm009/HomePageMFE> 03-2023 – 03-2023
Microfrontends (MFEs) are an architectural approach to building web applications where the user interface is composed of a collection of small, independently developed and deployed applications that work together seamlessly to create a larger, composite user interface
